Dear Supplier,

United Precision Products Co., Inc. (UPP) is a manufacture of quality precision-made aerospace fasteners and other such parts that are supplied to multiple customers that are affected by the law signed by President Obama in July 2010 known as the Wall Street Reform and Consumer Protection Act, also known as the Dodd-Frank Act.

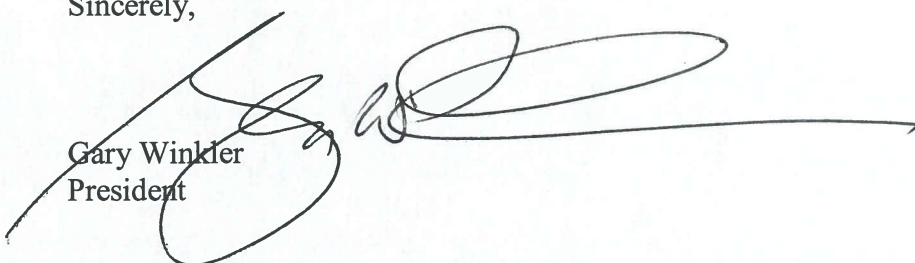

Congress enacted Section 1502 of the Act because of concerns that the exploitation and trade of "Conflict Minerals" by armed groups is helping to finance conflict in the Democratic Republic of the Congo, (DRC), region and is contributing to an emergency humanitarian crisis. The final rule adopted by the SEC on August 22, 2012 mandates that companies registered with the SEC comply with this final rule for the calendar year beginning January 1, 2013. Under the final rule, a company that uses any of the designated minerals, including Tantalum, tin, gold or tungsten, is required to conduct a reasonable 'country of origin' inquiry that must be performed in good faith and be reasonably designed to determine whether any of its mineral originated in the covered countries or are from scrap or recycled sources.

If any Conflict Minerals originated or may have originated in the DRC or and adjoining country and did not come, or may not have come, from scrap or recycled sources, companies will have to conduct additional supply chain due diligence and determine whether those Conflict Minerals are "DRC conflict free. More information about this rule can be found at <http://www.sec.gov/news/press/2012/2012-163.htm>.

Even though United Precision Products Co., Inc. is not a SEC registered company, many of it's customers are, and they are requiring UPP to assist them in providing an update on our supply chain to indentify the origin of the raw material that UPP uses to produce the parts manufactured and supplied to them. Therefore, as soon as possible, please provide a summary of your due diligence efforts and any results or reports that you have generated or received to date relating to the origin and chain of custody of Conflict Minerals used in any of the materials you provide to us. Depending on the information you provide, we may need additional information about these Conflict Minerals.

Should you require further information regarding this matter or if you prefer to discuss This request, please contact Charles Sirois at (313) 292-0100.

Sincerely,

Gary Winkler
President
