**ENGINEERING
MISSION-READY
SOLUTIONS**

**PRODUCING HIGH QUALITY,
PRECISION AEROSPACE COMPONENTS—
READY WHEN DEMAND IS CRITICAL**

SCULPTORS. CREATIVES. MACHINISTS.

To meet the wide-range of demands placed on military applications, we maintain a parts catalog of over 150,000 unique parts, following tight tolerances held to five decimals.

COMPLEX IS OUR SPECIALTY

We specialize in manufacturing your parts from conventional steel, super alloys, and corrosion-resistant materials on our advanced equipment with reliability in harsh, remote environments.

**QUALITY SYSTEMS
ENSURE PARTS ARE
RIGHT THE FIRST TIME.**

PROCESS. INSPECTION. OVERSIGHT.

With first-piece inspections at every manufacturing step, we ensure quality at the source, complying with military and government standards reaching beyond QSLM, ITAR, and DFAR.

MEETING CRITICAL DELIVERIES.

Military and prime government contractors have trusted us to align specifications with materials to efficiently finish the manufacturing process for more than 70 years.

ENHANCE. SURPASS. EXCEED.

We have built our business around manufacturing high-quality, precision-made fasteners and related hardware and have steadily expanded to encompass a broad range of standard and specialty precision-machined hardware.

Our proprietary **Process Review Optimization Program (PROP)** brings manufacturing, engineering, and quality together to realize manufacturing efficiencies, lowering cost and locking in quality.

The UPP logo is a trademark and PROP is a registered trademark of United Precision Products Company Incorporated.
